

Marking our 40th Anniversary with many Thanks and Renewed Commitment

FUJISOFT marks its 40th anniversary this year,
meeting all challenges and creating new answers since its founding in 1970.

As the world enters the age of ubiquitous computing,
our solutions, technologies and services have proven valuable
and been highly rated by our customers.

FUJISOFT Group will further refine those technologies in which it is
particularly strong—such as system development, telecommunications,
video processing, digital delivery and robotics—and continue to combine them to
provide unique new answers for its customers and society at large.

As we mark our 40th anniversary, we are energetically expanding our business
overseas to further globalize ourselves. We are reforming our business model to
help drive our long-term growth and successfully reach our 50th anniversary.
More specifically, we aim to become the sort of unique corporate group consisting of
integrators of ubiquitous and cloud computing services,
which truly makes a difference in our future.

A new answer is here.
